ACKNOWLEDGEMENT

The completion of this project is dream come true with the help of all my well wishers.

We would like to express our sincere thanks to Hon.Principle Dr. V. S. Zope of KCES's PGCSTR Jalgaon, for his encouragement and motivation during the project work.

We are also grateful to our project guide Mr. Akash Wagh Head of Department of Statistics of KCES's PGCSTR Jalgaon for their valuable suggestion and guidance for completing this project we would heartily thanks to people behind us, our source of inspiration, our strength and our family.

We cannot conclude our acknowledgement without expressing our thanks to all our friends who helped us directly or indirectly during course of this project.

- 1. Patil Dhanashri Dipak

INTRODUCTION:

YouTube is an American online video sharing platform, launched by Steve Chen, Chad Hurley and Jawed Karim during 2005. YouTube allows users to upload videos, view them, rate them with likes and dislikes, share them, add videos to playlists, report, make comments on videos, and subscribe to other users.

YouTube offers a wide variety of user-generated and corporate media videos. Available content includes video clips, TV show clips, music videos, short and documentary films, audio recordings, movie trailers, live streams and other content such as video blogging, short original videos, and educational videos.

As of February 2017, there were more than 400 hours of content uploaded to YouTube each minute, and one billion hours of content being watched on YouTube every day. Over the years, YouTube has expanded beyond the website into mobile apps, network television, and to permitting other services like discord and Nintendo to access YouTube. The range of videos on YouTube is seemingly infinite; users can find music videos, video clips, short and documentary films, audio recording corporate sponsored movie trailers, live streams, video blogs as well as content from regular you Tubers. Over the past years, established media corporations such a Disney, Viacom CBS, Warner Media have created and expanded their corporate YouTube channels to promote their content to a larger audience.

In 2006, when YouTube was a year old, it was bought by google for US\$1.65 Billion. Under Google from 2006 on words, YouTube evolved from a small video streaming platform to an international juggernaut influencing popular culture, internet trends, and creating multimillionaire celebrities. YouTube as a company has reported revenues of \$19.8 billion in 2020. Globally, after google.com, YouTube is the most visited website, with over one billion monthly users.

History:

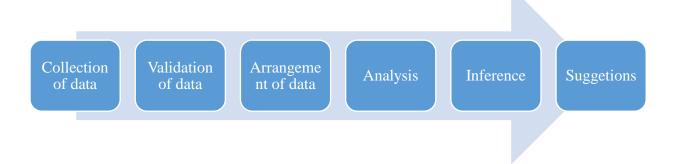

YouTube was founded by Steve Chen, Chad Hurley, and Jawed Karim. The trio were all early employees of PayPal, which they left enriched after the company was bought by eBay. Hurley had studied design at Indiana University of Pennsylvania, and Chen and Karim studied computer science together at the University of Illinois at Urbana-Champaign.

There are multiple stories told of the company's founding. According to a story that has often been repeated in the media, Hurley and Chen developed the india for YouTube during the early months of 2005, after they had experienced difficulty sharing videos that had been shot at a dinner party at Chen's apartment in San Francisco. Karim did not attend the party and denied that it had occurred.

YouTube began as a venture capital- funded technology start-up. Between November 2005 and April 2006, the company raised money from a variety of inventors with sequoia capital, \$11.5 million, and Artis capital management, \$8 million, being the largest two. In February 2005, the company activated www.youtube.com. The first video downloaded April 23, 2005. Title me at the zoo, it shows co-founder Jawed Karim at the San Diego zoo and can still be view on the site. In MI the company launch a public beta and bye November, a Nike ad featuring Ronald in home became the first video to reach 1 million total views. The site launch officially on December 15 2005 by which time the site was receiving 8 million views a day. Clips at the time where limited to 100 megabytes, as little as 30 seconds of footage.

METHODOLOGY

We have collected secondary information from various authentic sources, web sites and web portals of government of India. We have collected data like YouTube channels, followers, videos. The road map for collection to analysis is as follows:

2.1 Collection of data:

We have collected YouTube channels data. Our data includes 17 YouTube channels like music, entertainment, education and so on. Data consist over 150 countries along with channel followers and videos uploaded. And some facts regarding study area were collected from different sources which are mentioned in references.

2.2 Validation and Arrangement of data:

All collected data arranged as per desired in scheduled table. First of all major category is YouTube channels and within it countries as minor category. And secondly major category is country and within it YouTube channels as minor category. We collect this data set for 17 YouTube channels and over 150 countries from official website so there is no need of validation of data.

2.3 Analysis of data using different descriptive statistics:

We have ample quantum of data which is being very useful in further analysis. We have applied different descriptive statistics like average and correlation. This is very helpful in understanding of dispersion of data in given format.

The factors like YouTube channels, countries, followers, videos presented in the paper based on secondary data obtained from www.kaggle.com.

STATISTICAL TOOLS

One Way ANOVA:

One-way analysis of variance (one-way ANOVA) is a technique that can be used to compare means of two or more samples.

$$SST = \sum n (x - \bar{x})^2$$

$$MST = SSTp-1$$

$$SSE = \sum (n-1)s2$$

$$MSE = SSEN - p$$

$$F = MST/MSE$$

The calculation for the sum of square for the factor follows:

SS Factor =
$$\sum n_i (\overline{y}_i - \overline{y}..)^2$$

The calculation for the mean square for the factor follows:

$$MS Factor = \frac{SS Factor}{DF Factor}$$

Degrees of Freedom:

DF (Factor) = r - 1

DF Error = $n_{\text{\tiny T}} - r$

DF Total = $n_{\rm T} - 1$

F-Test:

An *F*-test is a statistical test in which the test statistic has an *F*-distribution under the null hypothesis. It is most often used when comparing statistical models that have been fitted to a data set.

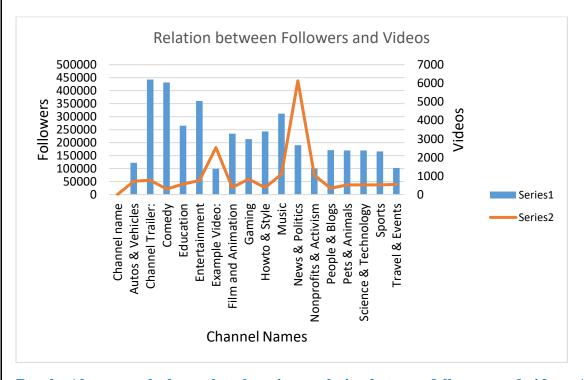

A Statistical F Test uses an F Statistic to compare two variances, $\sigma 1$ and $\sigma 2$, by dividing them. The result will always be a positive number because variances are always positive. Thus, the equation for comparing two variances with the F-test is:

F-value = variance1/variance2

i.e. F-value = $\sigma 21/\sigma 22$
